## about kg³

kg³ was founded by specialist professionals with procurement, logistics and consulting backgrounds in 2013. We aim to offer innovative, lean and easily manageable technology solutions. Competitiveness and time-efficiency are at the heart of what we do and is our competitive advantage.

Besides a comprehensive SaaS suite, kg³ offers consulting and interim management in the areas of sourcing and procurement.

tender management

The kg³ Tender Management solution enables Logistics Service Providers to increase win-rates through an efficiently managed quotation process. The Tender Manager uses the system to plan and assign quotation of transportation legs to internal and external quoting parties, whose rate submissions are validated by the system before being merged into a consolidated customer response.
